- Lithium-ion battery offers 20+ hours of use
- Auxiliary stereo input (1/8-inch cable included)

Tough Sounds earmuffs make working with power tools fun and they protect your hearing. With a Noise Reduction Rating of 23 decibels, your hearing is protected from the rumble of your lawnmower, weed wacker, and any other loud equipment. Plus, you can listen to your favorite music while you work and even answer phone calls using the built-in mic. Tough Sounds earmuffs have Bluetooth technology built-in, so you can stream your music wirelessly. An AM/FM radio is also included, and all the controls you need are built right into the earmuffs. Your music player or phone stays safe in your pocket. Skipping tracks, changing radio channels, or adjusting volume is quick easy, so you can dial in the big game or turn up the track and get back to work.
