

Shelly 1PM Mini Gen3

Track your power consumption and save money

Tailored for controlling and measuring the power consumption of appliances up to 8A, Shelly 1PM Mini Gen3 is perfectly suited for smaller devices, including personal electronics, lighting fixtures and kitchen gadgets.

Free data storage

Shelly 1PM Mini Gen3 offers free data storage, providing access to historical data for analysis and comparison.

Shelly^{Gen3} Mini Series

Shelly PM Mini Gen3

Preventative monitoring

Shelly PM Mini Gen3's smart energy metering will help you identify and eliminate any redundant energy consumption from each connected appliance around your home or facility.

Identify and report the increase in energy consumption

Shelly PM Mini Gen3 will fit anywhere you need it to and can immediately report the increase in energy consumption, saving you additional expenses on repairs or equipment replacement.

Shelly 1 Mini Gen3

Lighting control wherever you need it

Thanks to its compact size, Shelly 1 Mini Gen3 can discreetly fit within the ceiling rose of your lamp or in jammed wall boxes.

Make any small electrical appliance smart

Mini Gen3 series is equipped with a powerful Shelly chip boasting 8MB of memory, doubling both device efficiency and responsiveness. Shelly 1 Mini Gen3's 8A limit is perfect for transforming small to medium-sized appliances into smart devices. It can be discreetly placed inside the appliance's casing, avoiding the need for additional external wiring or modifications.
