

## zero-key USB Adapter Raspberry Pi Zero BadUSB Expasion Board

Zero-key skillfully designed to convert raspberry pie zero into U disk, without data line plug and play, convenient and direct, can be realized:

- 1, SSH, managing raspberry pies directly on a computer through USB
- 2, BadUSB function can be realized, keyboard injection to the computer, network hijacking function
- 3, create plug and play web server, convert raspberry zero to U disk, do not need data line plug and play, support raspberry zero and zero W, and manage raspberry pie directly through USB on computer directly.

With the P4wnP1 project, the BadUSB function can be realized, the keyboard is injected into the computer and the network hijacking function is used. P4wnP1 web site: <https://github.com/mame82/P4wnP1>
