

Features:

- Universal AC input / Full range (up to 305VAC)
- Built-in active PFC function
- High efficiency up to 90%
- Protections: Short circuit / Over current / Over voltage / Over temperature
- Cooling by free air convection
- Fully isolated plastic case
- Fully encapsulated with IP67 level (Note.6)
- $^{\bullet}$ Class ${\rm I\hspace{-.1em}I}$ power unit, no FG
- Suitable for LED lighting and moving sign applications
- · Compliance to worldwide safety regulations for lighting
- Suitable for dry / damp / wet locations
- 3 years warranty

NOTE	1 All parameters NOT special										
	2. Ripple & noise are measure	pecially mentioned are measured at 230VAC input, rated load and 25° C of ambient temperature. easured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.									
		e: includes set up tolerance, line regulation and load regulation.									
	4. Constant current operation region is within 60% ~100% rated output voltage. This is the suitable operation region for LED related applications, but please reconfirm special electrical requirements for some specific system design.										
	5. Derating may be needed under low input voltages. Please check the static characteristics for more details.										
	6. Suitable for indoor use or ou	por use or outdoor use without direct sunlight exposure. Please avoid immerse in the water over 30 minutes.									
		set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time. r supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the									
	complete installation, the fin								HIII DO AI	.5510G Dy 111G	

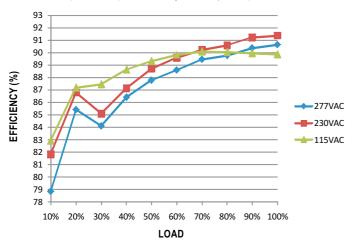

■ Power Factor Characteristic

■ EFFICIENCY vs LOAD (48V Model)

LPF-60 series possess superior working efficiency that up to 90% can be reached in field applications.

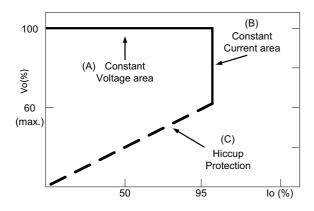

■ DRIVING METHODS OF LED MODULE

There are two major kinds of LED drive method "direct drive" and "with LED driver".

A typical LED power supply may either work in "constant voltage mode (CV) or constant current mode (CC)" to drive the LEDs.

Mean Well's LED power supply with CV+ CC characteristic can be operated at both CV mode (with LED driver, at area (A) and CC mode (direct drive, at area (B).

Typical LED power supply I-V curve
