COATING

Specification

Power	3×AAA batteries (not included)
Dimensions of the scale	300×300 ×22mm
Measuring range (from - to):	5Kg - 180 Kg
Weight limit	180 kg
Material	composite
Operating temperature	0 °C to 40 °C
Measuring Values	Weight / BMI / Body fat / water content (Body water percentage) / Muscle/Calorie (KCAL) / Bone Mass / Body Score /Fat-free Body Weight / Visceral fat / Protein / Body Type / Metabolic Age Curve trend lines
App	Tesla Smart app for Android and iOS
App Language	EN,DE,CZ,SK,PL,HU,SL,HR,UA,RU
Connectivity	Wi-Fi 2.4 GHz IEEE 802.11b/g/n - a big advantage over the competition

WIFI

More than a scale, the Tesla Smart Composition Scale Wi-Fi Style is a stylish addition to your bathroom. Although it doesn't look like it, this smart scale can measure up to 13 readings, which are also sent instantly to your smartphone.

ITO COATING

The top of the device features 6mm thick composite glass that responds to human touch. This modern material is not only very elegant and surprisingly functional, but also allows for even greater accuracy in measurement than more conventional electrodes.

Tesla Smart for Android and iOS

TESLA SMART APP

The scale communicates with your smartphone or tablet using Wi-Fi. This way, you can also connect it to a smart app that can work on iOS and Android devices. This app will help you to better navigate through the data and can also warn you if your health could be at risk.

4 TENSIO METERS

There are four strain gauges for measuring the scale itself. These are strategically integrated so that the most accurate measurement of a given weight is always achieved.
